

CIMPLASTA Srl produces plastic components through injection molding, intended for the household appliance, automotive, and industrial sectors.

CIMPLASTA believes that its entrepreneurial activity cannot disregard the essential protection of the environment, considered both as a heritage of the local communities where the company operates and as a common good of all humanity.

For this reason, it is committed not only to complying with legal requirements but also to promoting initiatives that strengthen the sense of responsibility and involvement of every employee, supplier, and customer regarding environmental protection.

The aim is to control the impact of activities, products, and services on the environment and to ensure that environmental performance meets and continues to meet both legal requirements and company objectives related to environmental policy.

CIMPLASTA is actively engaged in promoting any action aimed at protecting the environment and ensuring that products and processes do not present significant environmental risks.

Therefore, with regard to environmental policy, CIMPLASTA sets the following goals:

- Pursue continuous improvement of the Environmental Management System;
- Comply with all relevant environmental laws, regulations, and other commitments made by the company;
- Ensure that environmental performance meets and continues to meet legal requirements and company environmental objectives;
- Establish goals for continuous improvement of environmental performance;
- Adopt technological processes that offer the best possible environmental impact in both technical and economic terms;
- Evaluate the environmental aspects of products and production activities and implement management procedures to minimize any significant negative environmental impacts;
- Develop training and instruction for all employees to promote and encourage any initiative aimed at protecting the environment;
- Encourage suppliers to adopt an environmental management system;
- Communicate and engage with stakeholders;

Additional commitments:

- **Carbon neutrality:** the company is committed to setting emissions reduction and renewable energy goals and implementing measures to advance decarbonization throughout the value chain;
- **GHG emissions:** the company promotes efficient use of energy resources and the reduction of greenhouse gas emissions through the implementation of high-efficiency technologies and the promotion of renewable energy sources, aiming for net zero emissions by 2040;
- **Water quality, consumption, and management:** the company is committed to minimizing water use and efficiently reusing and recycling water;
- **Air quality:** the company commits to minimizing, and where possible eliminating, emissions that contribute to air pollution, as required by law and in compliance with it;
- **Responsible chemical management:** the company is committed to minimizing or eliminating the use of restricted substances in production processes to ensure regulatory compliance. CIMPLASTA is aware of the use of restricted substances in processes and finished products and actively seeks suitable substitutes to ensure proper product and environmental management;
- **Circularity:** the company promotes closed-loop systems, supports the use of sustainable and renewable natural resources, reduces waste, and increases reuse and recycling;
- **Biodiversity, land use, and deforestation:** the company is committed to protecting ecosystems, especially key biodiversity areas affected by its activities, and to avoiding illegal deforestation, in accordance with international biodiversity standards, including IUCN resolutions and recommendations;
- **Soil quality:** where appropriate, the company monitors and controls its impact on soil quality to prevent erosion, nutrient depletion, subsidence, and contamination;
- **Noise emissions:** where appropriate, the company monitors and controls industrial noise levels to prevent noise pollution.

Environmental objectives, in accordance with scientific and technological progress, will be applied based on market logic to all activities, productions, processes, products, and raw materials of the company.

This environmental policy provides the framework for establishing and reviewing environmental goals and targets. It is communicated to all employees and made available to the public.
